Fish farming

- The youngest activity of our company is growing catfish.
- Catfish grown in Recirculating aquaculture system

Fish farming

- Recirculating aquaculture system has an automatic work function and monitor our specialist 24 hours a day

Processing & Packing

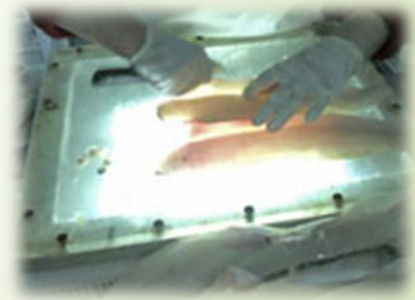

Processing

- The production base is completed with the modern expensive import technological lines, allowing to maintain the highest requirements and the standards showed to manufactures of the food-processing industry, to reduce expenses for manufacture and to raise quality of finished goods.
- Capacity of a complex makes about 150000 kg / month.
- Basis of unique manufacture for Ukraine is the technology "**shock**" **frosts** at temperature-70°C with use of the liquid nitrogen, which is not having analogues in the domestic market.

Processing

- The cooled fish comes in shop where low temperature mode does not allow an opportunity of bacteria growth.
- After clearing, gutting, cutting and filleting, the fish is checked on ichthyolopatologic verifying table with illumination.

Processing

Processing

- ▶ Then the fish, processed in appropriate way, is frozen by a cryogenic way. "Shock frost" is the guarantor of quality of production, allowing to keep not only taste of a product, and but also practically all vitamins present in it and useful substances.

Packing

- The vacuum packing
- The vacuum packing, the attractive appearance, convenient firm packaging is distinctive feature of the trademark, making production of " BASTION " company invariable attractive to the consumer.

Packing

- Corrugated board boxes of 5, 8, 10, 16 kg
- At the dispatch to wholesale buyers large lots of fish production the corrugated board boxes are used for the packing of goods.
